Re: Full Stack Developer Intern

Dear Hiring Manager,

I am excited to apply for the Full Stack Developer Intern position at BlackBerry in Waterloo, Ontario. As a full stack software developer with 2 years of experience and a student of Master of Applied Computing in University of Windsor with 88% GPA, I believe that I have the skills and qualifications necessary to excel in this role.

During my time working as a Full Stack Software Developer at two different companies, I gained extensive experience in developing applications using React and Laravel. I am confident that this experience has prepared me well for the challenges that come with working on BlackBerry Access - Desktop, the next generation email and collaboration application built using the latest JS framework - React. BlackBerry is still in the business and creating secure software solutions, working in the field of cyber security and IoT. I believe BlackBerry is revolutionizing the industry with IoT and cybersecurity technologies, and I can contribute in that domain.

As a Full Stack Developer Intern, I am eager to develop intuitive UI, integrate workflows and work alongside engineers, designers, and product owners. I have previously worked and excelled in organizations that used JavaScript and React, I have developed dynamic applications using React, Redux and lazy loading. Additionally, I have a solid understanding of data structures like Arrays, Array Lists, Maps and Sets, and exposure to Asynchronous paradigm in JS - callback, promises and async/await. I also have experience working with git and using IDE's.

My bachelor's degree in software engineering and my master's degree in Applied Computing, as well as my programming experience in JavaScript, make me a great fit for this position. I have a passion for solving problems and debugging issues, which I believe will help me thrive in this role.

Thank you for considering my application. I look forward to the opportunity to learn and work with principal and senior engineers at BlackBerry.

Sincerely,

Hamza Baig
